BIRD-WATCHING

The Gila Conservation Education Center had six presenters at G.W. Stout Elementary School on Friday for Fall Outdoor Classroom Day. Above, Tricia Hurley with GCEC and Ashley Chess from Aldo Leopold High School show students how to use binoculars to look for birds. Other presenters were Regina Willis with the Gila Resources Information Project, who spoke on the importance of "keeping the earth clean"; Keller Suberkropp with the Gila Native Plant Society, who showed students different types of plants in the area; Gayle Simmons, who taught the students about solar energy; Tanner Matchus with GCEC, who taught how to look for animal tracks; and Caleb Kalisher and Sammy Schulke from Aldo Leopold, who showed the students how to check for oxygen levels in water samples. For more information on the outdoor classroom, contact Hurley at 538-4345 or e-mail tylan@q.com.
